

On this map of Compass City, Vermont, one red location is labeled UPS. Label the other red locations with names of people you know.

Starting and ending at UPS and following the roads shown, draw the shortest route necessary to deliver to each location. If each block is one-half mile, how long is your complete route?

Where should you build a grocery store so that it would be most convenient for everyone? Choose from empty locations and remember to follow roads when figuring distance. Label your choice STORE.
